Book information

Authors: Paul A. Brunton
Title: Decision-Making in Operative Dentistry
Series: QuintEssentials of Dental Practice

Short text:

Operative Dentistry is a rapidly changing field of restorative dentistry. Advances in caries diagnosis and management strategies, pulp protection philosophies, tooth preparation techniques and dental materials have left practitioners somewhat unsure as to what is best practice. This book answers many of the questions frequently posed by practitioners, encourages a less interventive philosophy and is an easy-to-use resource for clinical decision-making.

Contents

Chapter 1. Clinical Diagnosis of Dental Caries
 Chapter 2. Caries Risk Assessment and Criteria for Intervention
 Chapter 3. Preservative Operative Intervention
 Chapter 4. Material Considerations
 Chapter 5. Pulp Protection Regimes
 Chapter 6. Minimizing the Effects of Further Operative Intervention
 Chapter 7. Notes on the Aetiology and Operative Management of Non-carious Tooth Tissue Loss
 Index

Categories: Practice Management, Restorative Dentistry
