Title: Laser in der Zahnmedizin | Laser in Dentistry

Short text:

This DVD-ROM presents live-action video demonstrations of laser applications in endodontics, periodontics, oral surgery, restorative dentistry, and cosmetic dentistry based on 15 years of research. Concise information on the physics underlying laser technology is followed by the theoretical principles guiding each treatment application. Typical cases illustrate the advantages of laser treatment in daily dental practice. This DVD-ROM is the perfect tool for those seeking clear, up-to-date information on how and when dental lasers can be reliably and safely implemented.

Contents

- History and Function of Dental Lasers
- Endodontics
- Periodontics (Calculus removal; Sulcus preparation)
- Oral Surgery (Ranulaectomy; Fibroma and hypertrophic tissue excision; Hemostasis)
- Restorative Dentistry (Caries removal; Preparation for inlays and veneers)
- Cosmetic Dentistry (Bleaching)
- Dental Hypersensitivity

Categories: Esthetic Dentistry, Oral/Maxillofacial Surgery, Oral Surgery, General Dentistry
