Información sobre el libro

Editor: Hülsmann, Michael / Schäfer, Edgar

Título: Problems in Endodontics

Subtítulo: Etiology, Diagnosis and Treatment

Texto breve:

With advances in endodontic techniques, increasingly complicated cases are undertaken—with variable results. As a consequence, the majority of procedures carried out by endodontic specialists today are retreatments. This book offers clinically relevant information for overcoming common problems in endodontic treatment. Due to the unpredictable nature of challenging endodontic cases, this is not a step-by-step manual, but rather a compendium of the latest knowledge in the field, including key findings and data from the scientific literature as well as case presentations and practical advice. A valuable reference for endodontists faced with treating compromised endodontic cases.

Contents

Chapter 01. Diagnosis

Chapter 02. Preserving Pulp Vitality

Chapter 03. Problems in Treatment Planning

Chapter 04. Health-Related Problems

Chapter 05. Preoperative Restoration and Placement of Rubber Dam

Chapter 06. Problems in Dental Anesthesia

Chapter 07. Problems in the Treatment of Endodontic Emergencies

Chapter 08. Problems in Gaining Access to the Root Canal System

Chapter 09. Visualization

Chapter 10. Problems in Determining Endodontic Working Length

Chapter 11. Problems in Root Canal Preparation

Chapter 12. Problems in Disinfection of the Root Canal System

Chapter 13. Problems of Root Canal Obturation

Chapter 14. Problems in the Assessment of Healing, Success and Failure

Chapter 15. Vertical Tooth and Root Fractures

Chapter 16. Periodontal-Endodontal Lesions

Chapter 17. Perforations

Chapter 18. Instrument Fractures

Chapter 19. Resorption

Chapter 20. Retreatment

Chapter 21. Incomplete Root Formation

Chapter 22. Aspiration and Swallowing Accidents

Chapter 23. Endodontic Treatment of Teeth with Anatomical Malformations

Chapter 24. Problems in Bleaching of Endodontically Treated Teeth
