Título: Quintessence of Dental Technology 2020

Serie: QDT Yearbook

Texto breve:

QDT 2020 presents original articles introducing clinical and laboratory techniques for optimal esthetic results with newer dental materials. Digital dentistry is featured throughout, with articles offering innovative ways to incorporate a combined digital/analog approach to build character and natural esthetics in CAD/CAM restorations. The 3D-printed interim immediate complete denture, self-glazing liquid ceramics, Inside Out technique, and 3D Magic MakeUp are but a few of the novel procedures featured in this beautifully produced annual resource for the laboratory technician and restorative clinician.
